FISCAL YEAR 2009 PROJECT REQUEST FORM

Project Name: Haines, AK Boat Harbor

Project Location: Haines, AK

Project Description (please attach additional pages as required):

The current harbor in Haines is overcrowded and cannot accommodate larger vessels. In the summer months, many vessels avoid the harbor entirely on the assumption that space will not be available. It is also exposed to heavy winds from the south, causing reduced maneuverability and damage to the vessels and harbor facilities, leading Haines Borough to seek construction of a new harbor. The Army Corps Chief of Engineers report was completed on December 20, 2004 and recommended moving forward with the project based on an NED cost/benefit ratio of 1.2. Total Federal cost is estimated at \$11.2 million, derived from the Corps and the full amount authorized in law. Total project cost (all features) is estimated at \$21 million. The project was just authorized (Section 1001(1)) in the Water Resources Development Act of 2007 and is now ready to move into its construction phase under the Army Corps' General Construction account.

Related Appropriations Bill: Energy & Water Approps

Amount of federal funding requested for FY09: \$11,232,000

Total funding to complete this project: \$11,232,000

Number of years to fund this project: 1

Matching funds from the State of Alaska: \$10,000,000

Matching funds from local and private entities:

State funding of \$10,000,000 from the FY 07 budget.

List legislation that authorizes this project:

Section 1001(1)) in the Water Resources Development Act of 2007

Check all that apply:

- ☐ A change in the current law is necessary in order to proceed with the project. (If so, attach language and a list of laws that need to be amended)
- ☐ Bill or report language is needed. (If so, attach requested language)

If this project was funded in prior appropriations bills (within the last five years), list each bill and the amount funded:

\$151,000 -- FY 2008 E & W Approps (ACOE/GI); \$300,000 -- FY 2006 E & W Approps (ACOE/GI). \$218,000 -- FY 2005 E & W Approps. Money was appropriated for the same purpose under E & W in FY 04 (\$300,000).

Amount included in the President's FY09 Budget: 0

Amount included in the State of Alaska FY09 Budget: 0

☐ Check this box if state funding was sought but not provided.

FISCAL YEAR 2009 PROJECT REQUEST FORM

Project Name: Haines, AK Road Improvements

Project Location: Haines, AK

Project Description (please attach additional pages as required):

Haines's roads have deteriorated substantially in recent years. The center of the community consists of roads with failing or no asphalt, significant potholes, and otherwise poor surfaces. There are still areas with poor materials that affect water and sewer utility lines, resulting in leaks and breaks. These roads sustained further damage during the heavy floods in SE Alaska in 2005. All of the roads in the proposed project area are arterial community streets that access the business district and healthcare facilities. They also connect historic Fort Seward with downtown Haines. These roads also connect the low-income housing residents and senior village with the medical clinic and the Haines Senior Center. The timing on this project is proposed to coincide with a planned state project that will bring an asphalt plant to town and allow for a lower cost of construction. The project's total cost is estimated at about \$2.4 million. The FY 2007 Senate TTHUD Approps Bill contained funding for the project, which subsequently fell through as a result of the project-free long-term Continuing Resolution.

Related Appropriations Bill: TTHUD Approps

Amount of federal funding requested for FY09: \$2,000,000

Total funding to complete this project: \$2,000,000

Number of years to fund this project: 1

Matching funds from the State of Alaska: 0

Matching funds from local and private entities:

\$400,000 State or local match

List legislation that authorizes this project:

FHWA Legislation

Check all that apply:

- ☐ A change in the current law is necessary in order to proceed with the project. (If so, attach language and a list of laws that need to be amended)
- ☐ Bill or report language is needed. (If so, attach requested language)

If this project was funded in prior appropriations bills (within the last five years), list each bill and the amount funded:

FISCAL YEAR 2009 PROJECT REQUEST FORM

Project Name: Haines, AK Sewer & Water

Project Location: Haines, AK

Project Description (please attach additional pages as required):

Haines continues to commit its resources to repair and upgrade its water and sewer infrastructure. This year the last of the wood-stave water line will be replaced and the WW2 era water main supply line will have a condition assessment. The highest priority for Haines is the replacement of the aged and failing asbestos cement water lines that serve many sections of the community. Asbestos cement pipe was popular in the 1940's and 1950's as a waterline material. Older asbestos cement pipe is brittle and prone to crack or leak. This Federal project, along with the local match, would replace over 3000 feet of asbestos cement pipe on View Street, Fourth Ave and Lynnvue Drive along with the service connections to the properties served by this line.

Related Appropriations Bill: Interior & Environment Approps

Amount of federal funding requested for FY09: \$750,000

Total funding to complete this project: \$750,000

Number of years to fund this project: 1

Matching funds from the State of Alaska: 0

Matching funds from local and private entities:

The Borough will supply the required 45% match

List legislation that authorizes this project:

Federal Water Pollution Control Act

Check all that apply:

- ☐ A change in the current law is necessary in order to proceed with the project. (If so, attach language and a list of laws that need to be amended)
- ☐ Bill or report language is needed. (If so, attach requested language)

FISCAL YEAR 2009 PROJECT REQUEST FORM

Project Name: Haines, AK Waterfront Development

Project Location: Haines, AK

Project Description (please attach additional pages as required):

The planned new boat harbor will have a tremendous economic impact and boost for the community. The original Borough plans for the harbor included development of uplands for improved vehicle access to the facility, parking, as well as potential service space. The planned Federal contribution to the project by the Army Corps will not cover these improvements. In order to make these improvements, Haines will first need to acquire uplands adjacent to the mooring basin. The essential lands for accomplishing this are valued at approximately \$575,000. Further site development costs are estimated an additional \$325,000, bringing the total cost to \$900,000. These upland developments are part of a coordinated effort to redevelop the waterfront properties and make this area more attractive to business revitalization. Given the plans for the harbor, we believe this project would be a candidate for EDA funding.

Related Appropriations Bill: CJS Approps (EDA)

Amount of federal funding requested for FY09: \$900,000

Total funding to complete this project: \$900,000

Number of years to fund this project: 1
